PODD Ontology Driven Database

Dr Peter Ansell

PODD Ontology Driven Database

Dr Peter Ansell

University of Queensland

13 March 2012

Background

PODD Ontology Driven Database

Dr Peter Ansell

- PODD implemented between 2009 and 2011
- Design by Yuan Fang Li and Gavin Kennedy for High Resolution Plant Phenomics Centre

Motivation

PODD Ontology Driven Database

Dr Peter Ansel

- Flexible scientific experiment management
- Use RDF and OWL technology to support science

Example

PODD Ontology Driven Database

Dr Peter Anse

Simultaneous Phenotyping of Drought Stress Tolerance in Arabidopsis OST1-2 Mutant and Wild Type

Credit to Xueqin Wang for the example design: http://podd.plantphenomics.org.au/podd/ object/poddObject:838

Interface Layer

(Restlet, Freemarker)

Object Services Metadata Services Publishing Services Search & Query

Security Layer

(Spring Security, custom authorization)

Business Logic Layer

Object Management Concept Management Reasoning Service

Data Access Layer

Fedora Commons Sesame Triple Store

MySQL Database Lucene Index

users, roles

Demo

PODD Ontology Driven Database

Dr Peter Ansel

http://podd.plantphenomics.org.au/podd

Evaluation

PODD Ontology Driven Database

Dr Peter Ansell

Good:

- Flexible : Simultaneously support different experiments
- Adaptable : Additions and changes to schema ontologies

Bad:

- Current implementation does not scale with experiment size
- 2 Only supports OWL-1.1
- Uses old versions of Fedora and Spring

Next steps

PODD Ontology Driven Database

Dr Peter Ansell

- Use upcoming SPARQL 1.1 Query and Update standards
- Use OWL-2 and pure SPARQL access to databases
- Support links from experiments to other RDF documents

Questions

PODD Ontology Driven Database

Dr Peter Ansel
